Hello, It's Jaykay

My name is Kayode Sholanke and I'm an enthusiastic product designer currently shaping the future of design in Nigeria. I am passionate about creating user centric, delightful and human experiences.

I enjoy creating websites and mobile apps that are simple, beautiful, and easy to use. Sketches and mockups are so important to achieve simple a minimalistic approach. Thats why I do give importance to wireframing process.

I do like to share and discuss ideas and concepts which leads us to learn more. We should ask more questions to develop ourselves in terms of design.

I'm quite passionate about creating human centric products so my design work is driven by user research. I believe in using design and technology to create opportunities for people and businesses.

If you'd like to talk about a project you want help with or need an advice about product design, just drop me a message at jaykaykayode@gmail.com. I'm currently AVAILABLE to work on new (and cool) ideas and if you've got one of those? Say hello to me :)
Stay with pixels. up!

JK
